

GAYOUNG HAN

Multimedia Design Student

Spring 2027 Internship

Most of my projects have focused on UX/UI, and I've been involved across the process, from research and early ideas to prototyping, testing, and front-end implementation.

I pay attention to detail and enjoy finding ways to make digital experiences cleaner, more consistent, and easier to use. I also have front-end skills and built my portfolio website in React, which helps me understand how design translates into development.

I'm interested in working with digital products where I can combine user-centered design, visual thinking, and technical curiosity while learning from and contributing to a collaborative team.

Korean	Native
English	Fluent
Danish	Pre-Intermediate

Experience

AP Degree in Multimedia Design

Erhvervsakademi Aarhus · 2025 - Current

Project-based programme covering UX/UI design, visual communication, design systems, responsive web design, front-end development, prototyping, and usability testing.

Selected Projects

 **Blå Sol Festival App** - Focused mainly on UI design, leading the design system and creating reusable UI components and an interactive prototype in Figma.

 **Spilcaféen** - Took part in user research and concept development, then focused on building a consistent visual direction across the interface through color, typography, spacing, and reusable UI components.

Sales Assistant, Full-time & Part-time

Uniqlo, Copenhagen · 2023 - 2026, various periods

- Followed Uniqlo's visual merchandising guidelines to keep displays clear, consistent, and aligned with the brand.
- Worked closely with the team during daily briefings and seasonal changes, adapting displays to product priorities, sales results, and customer needs.

Customer Service Specialist, Full-time

Booking.com, Seoul · 2018 - 2022

- Managed customer cases across Booking.com's digital services, identifying issues and coordinating with customers, properties, and internal teams to find solutions.
- Used KPI dashboards and quality reviews to identify areas for improvement and make targeted adjustments to my work.
